TRIACS
T8xx series
Main Features:

I_{T(RMS)}	V_{DRM/V_{RRM}}	V_{TM}
8A	600V and 800 V	≤ 1.5 V

Description:

High current density due to single mesa technology; Glass Passivation.T8xx series triacs is suitable for general purpose AC switching .They can be used as an ON/OFF Function in applications such as static relays,heating regulation motor starting circuits...or for phase control operation light dimmers,motor speed controllers.T8xx series are 3 Quadrants triacs.They are specially recommended for use on inductive loads.
